Summary

I am a bilingual full-stack Ruby on Rails developer living in Tokyo.

I am attracted to Rails' ability to allow me to rapidly organize my code with the MVC framework and seamlessly integrate Javascript and CSS via bundling. More recently I am excited by the power and potential of Stimulus to create user-friendly single page applications.

In my free time I am studying Japanese to aim for a JLPT N1 certification, studying web development via TheOdinProject, and working on personal projects.

Projects

Karaoke Song Organizer, [More Info](#)

- All-in-one karaoke app developed with **Ruby on Rails**. Via the **Genius API**, the **IP2Location API**, several **Google APIs**, and **web scraping**, users can search and save songs with full lyrics and karaoke store locations to a **PostgreSQL** database.
- Front-end was created using **HTML5**, vanilla **Javascript**, and **Tailwind**.

Social Media Site, [More info](#)

- Social media site developed with **Ruby on Rails** and tested using **Minitest**. Authentication is handled by **Devise** and **Oauth2** allowing users to create new accounts or login via Facebook. Users can add friends, make posts, share pictures and update their profile.
- Front-end was created using **HTML5**, vanilla **Javascript**, and **Bulma**

CLI Chess, [More info](#)

- Two player command line Chess game built using **Ruby** and tested with **Rspec**. Built as the final project of the Ruby section of TheOdinProject to cement the concepts of OOP and inheritance.
